REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: None of the prior art of record discloses or suggests the claimed electrical connector for connecting oppositely arranged first and second mating means as being recited the independent claim of the present application. Specifically, upon further review of the prior art of record, they lack the recited combination of an electrical connector comprising a support member made of a non-rigid resin capable of being elastically deformed, a first circuit having a plurality of electric contact elements arranged on one surface of said support member to contact electric contacts of said first mating electrical means, a second circuit having a plurality of electric contact elements arranged on the other surface of said support member to contact electric contacts of said second mating electrical means, and conductors connecting said first and second circuits, wherein said electric contact elements of the first and second circuits are formed in the most suitable manner to meet the shapes of the mating electric contacts, respectively, wherein when said first mating electrical means is a ball grid array connector and said second mating electrical means is a printed circuit board, said electric contact elements of the first circuit are each provided on their surfaces with at least one ridge having a triangular cross-section and said electric contact elements of the second circuit are hemispherical protrusions, thereby making the surfaces of the first and second circuits different in shape.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
